Green Pin[®] Lifting Clamps

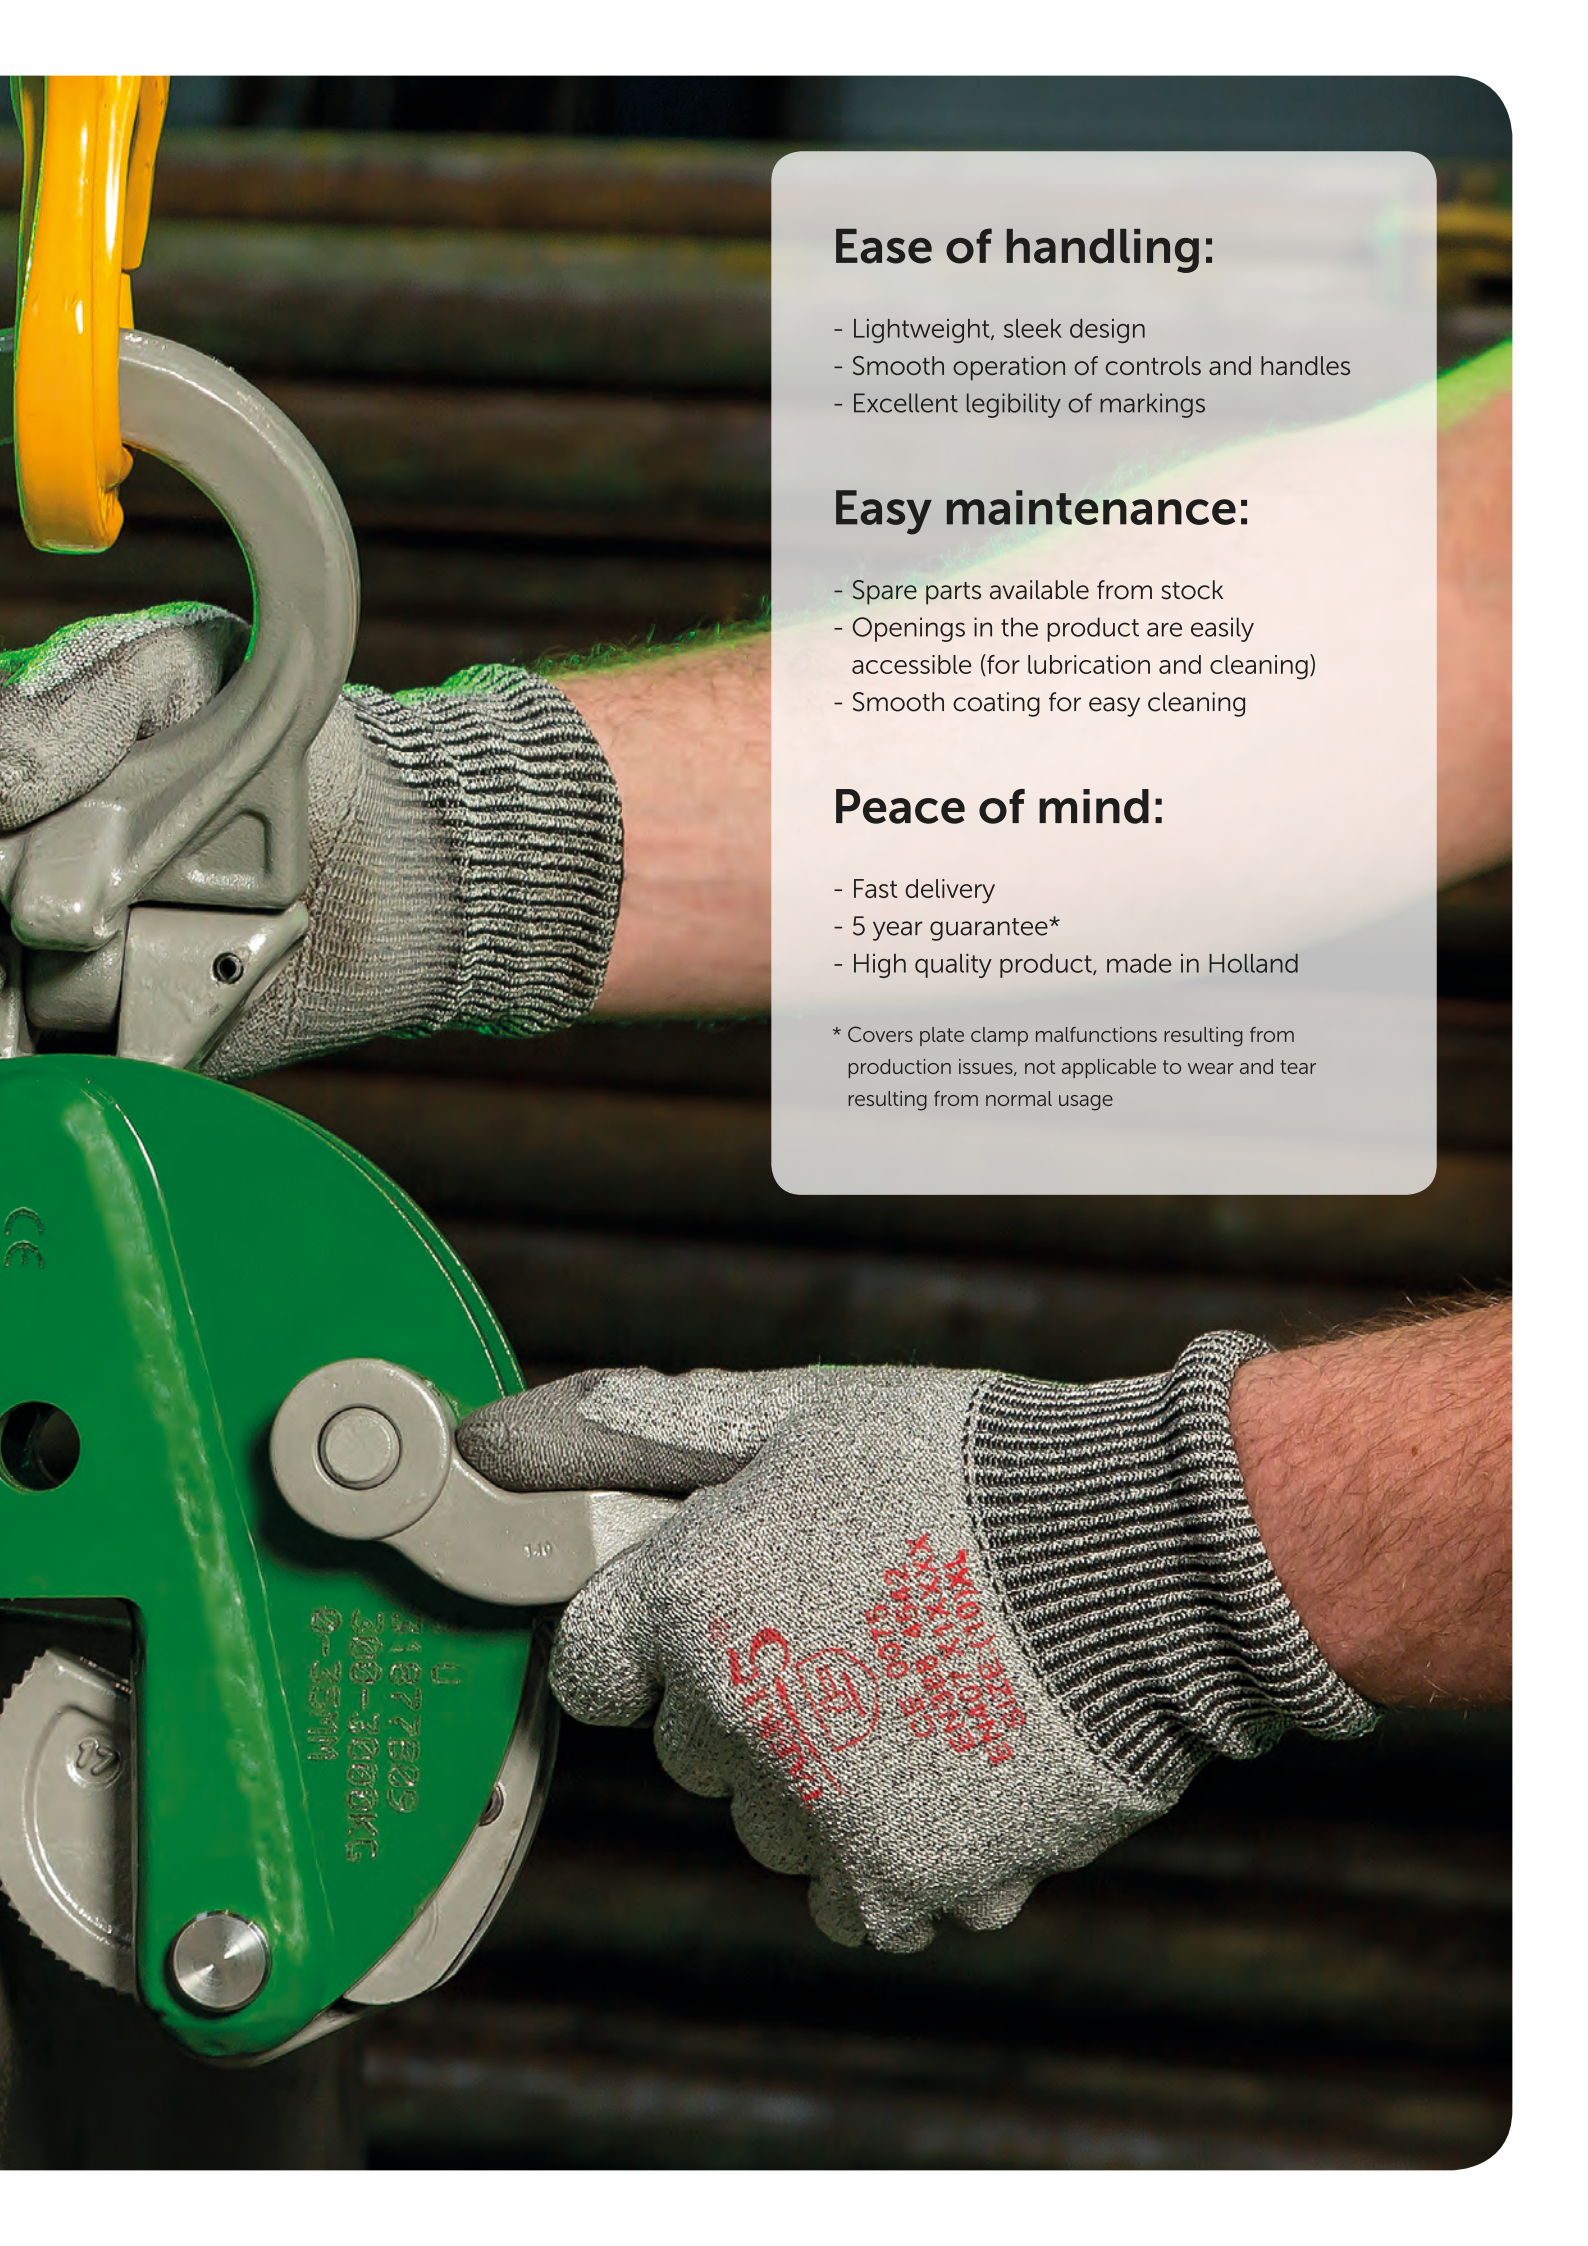

A solid grasp on
safe and easy lifting

Green Pin[®] is proud to present its next generation of lifting clamps. Our new range has been designed to offer greater ease of use. Handling and maintenance could not be simpler while the products' sturdy build offers peace of mind. What is more, our new vertical and universal clamps are one-third lighter than their predecessors. Of course, Green Pin[®] Lifting Clamps come complete with five-year warranty and fast delivery.

Safe, simple, rugged and reliable. And fully integrated into the existing Green Pin[®] range of products.

2018
GREEN PIN

Ease of handling:

- Lightweight, sleek design
- Smooth operation of controls and handles
- Excellent legibility of markings

Easy maintenance:

- Spare parts available from stock
- Openings in the product are easily accessible (for lubrication and cleaning)
- Smooth coating for easy cleaning

Peace of mind:

- Fast delivery
- 5 year guarantee*
- High quality product, made in Holland

* Covers plate clamp malfunctions resulting from production issues, not applicable to wear and tear resulting from normal usage

SAFETY
GLOVES
MADE IN HOLLAND

The same performance – with a difference

Green Pin® Lifting Clamps are extremely safe thanks to an innovative plate-locking system. They are easy to handle as a result of their low weight and their sturdy build and coating ensure long-term durability.

Green Pin® offers a wide range of lifting clamps for lifting horizontal and/or vertical steel plates and beams (ranging from WLL of 0.75 up to 25 tons). These clamps can handle steel plates with widths up to 150 mm and beams with widths up to 470 mm. Typical users include shipyards, construction companies and a wide variety of manufacturers.

Certification

- 2.1 and 2.2 works certificate
- Manufacturer test certificate
- CE Declaration of Conformity

Whatever your clamping needs, we've got you covered

Four different types are available. All these types are available with a BigMouth® enlarged opening.

V-Type

U-Type

H-Type

H-Type for beams

	Direction	WLL Range	Clamp mouth opening range	Plates	Beams and profiles	Used in pairs
